## About Me

I am transitioning to a career as a Junior Full Stack Developer having previously worked as an Surveyor Engineer.

I've recently fulfilled a personal ambition to learn how to code on the Makers Software Engineering 16 Week Bootcamp and I hope to be able to use these new skills to begin a career more focused in tech and develop business solutions that are more user friendly and profitable.

## Work history

### Ridgeway Survey Limited - Engineer Surveyor

01/2021 - 03/2022

- Designed a long-term asset management strategy which was adopted across the business.
- Simplified the internal reporting process which resulted in a 70% increase in productivity for the department
- Successfully advised on a property dispute, resulting in the company avoiding legal proceedings.
- Led over 30 commercial projects of various scales which were all completed on time and to budget
- Resolved an emergency reactive maintenance issue due to flooding, resulting in a property down time of under 48 hours.

## Accomplishments/Projects

### Beach Life

A web application that helps users locate their nearest beach in England and provides weather and tide information.

Tech/Tools - MongoDB (Atlas), Mongoose, React.JS, Node.js, Express

### Acebook

Full stack Facebook clone. Originally built with Handlebars and passwords are encrypted using Bcrypt.

Tech/Tools -Node.js, MongoDB, Mongoose, Express, Handlebars, Cypress, Jest
