ABOUT ME

I am a Software Developer recently graduated from Makers Academy and I have previously worked as Surveyor Engineer in London. After years of trying to find myself, I felt the desire to work on something that has a stronger impact on the user's life. Even if one of the most important tasks of surveying a building is to decide how the user experiences the space, I felt the desire to go deeper. I wanted to create products that change people's lives, help them do their work, empower them and provide better and more reliable services. I have always been passionate about tech. The way it is changing our lives really excites me so I started coding and immediately got a lot of satisfaction from it.

EXPERIENCE

Survey Engineer, 03/2021 - 09/2021

Ridgeway Survey Limited

- I learnt to pay close attention to detail especially when measuring and keeping track of the movement of the buildings
- Working as a land surveyor required a lot of team work and also required verbal and written communication to solve problems
- One of the major huge factors of a land surveyor is to problem solve and being a part of a project from start to finish and the ability to recognise and solve complicated problems

Courier Driver/Courier Exchange, 01/2020 - 03/2021

- To establish and maintain constructive relationships with companies
- Planning routes and sorting packages into order
- Finding quickest route to delivery addresses
- Signing for packages that you pick up and obtaining signatures when delivered
- Keeping paperwork and delivery records up to date

PROJECTS

Beach Life

A web application that helps users locate their nearest beach in England and provides weather and tide information

Tech/Tools - MongoDB (Atlas), Mongoose, ReactJS, Nodejs, Express

Acebook

Full stack Facebook clone. Originally built with Handlebars and passwords are encrypted using Bcrypt

Tech/Tools -Node.js, MongoDB, Mongoose, Express, Handlebars, Cypress, Jest

SKILLS

- Problem Solver
- Quick learner
- Creative

I manage to gain all these skills threw software engineering, I love problem solving because problem-solving starts with identifying the issue, coming up with solutions which my creativity side comes to play and then implementing those solutions, and evaluating their effectiveness.

EDUCATION

2022

Maker Academy

- Emphasis on Test-driven development (TDD), pair-programming and agile workflows, as well as emotional intelligence and XP values
- Focus on becoming "language agnostic" and able to adapt to new languages with ease
- Full stack web development, including web frameworks like Ruby on Rails and ReactJs

2022

CS50

- Learnt about abstraction, algorithms, data structures, encapsulation, resource management, security, software engineering, and web programming
- Covered languages include C, Python, and SQL plus HTML, CSS, and JavaScript. Problem sets inspired by the arts, humanities, social sciences, and sciences.

Level 3 Diploma : IT, June 2013

Westminster Kingsway College

Double Distinction

GCSE : Math, June 2012

Cardinal Pole RC

Grade C

GCSE : IT, 2012
