Professional summary

My professional career has predominantly been in the engineering field, where I cultivated methods that enabled my pivot towards software engineering. I learn and apply quickly, with lasting impact, and most importantly with great enthusiasm. I work extremely well as part of a team, synchronously and asynchronously. I strongly value inclusivity, feedback, communication and continual growth.

Experience

Software Engineer(developer community contributor), 06/2021 – Current

Deen Developers

- Contributed to a digital foodbank called footpot , incorporating the Google Place and Google Maps API to give users abundant of information on where the nearest local food centre is.
- Assisted in the development of a website for a non-profit alliance to graphically show and analyze data for local food banks.
- Communicated and worked with clients to discuss and determine requirements to implement software solutions that fit their business needs.

Software Engineer, 04/2022 – 08/2022

Makers Academy

- Designed and built signup and login pages using HTML and javascript and used SQL to save user info in the database. Also, implemented the voice-to-text function using Google speech recognition API.
- Created a search engine: front-end of the website using React for user interaction. Retrieved of data from a dataset using MongoDB and regex based on users input.
- Worked with Agile methods in order to maximise productivity in sync/async set-ups using tools such as Trello, Miro, GitHub Projects. Learnt how to work remotely, maintaining strong engagement in team projects

Software Engineer Intern, 09/2021 – 02/2022

Panda

- Was responsible for building the sign up feature
- Built user interfaces with React to showcase dynamic content.

Engineer Surveyor, 12/2020 – 09/2021

Ridgeway Survey Limited

- Planned, developed and implemented a live customer feedback project which allowed customers to review their service, which increased customer satisfaction by 25% from the previous year's survey.

Projects

Beach Life
App that helps users locate their nearest beach in England and provides weather information.
Tech/Tools - MongoDB (Atlas), React.JS, Node.js, Express

Acebook
Full stack Facebook clone.
Tech/Tools -Node.js, MongoDB, Mongoose, Express, Handlebars, Cypress, Jest

MakersBnB
Full stack Airbnb clone
Tech/Tools - Ruby, RSpec, Capybara, Sinatra, PostgreSQL, HTML, CSS
